Pneumatico per vetture compatte e medie, che richiedono elevati comfort di guida e sicurezza, senza trascurare i consumi di carburante e il relativo impatto ambientale. I quattro canali interni con vie di fuga esterne permettono ottime performance su asciutto, come su superfici bagnate.

A tire designed for compact and medium cars delivering high driving comfort and safety; not to mention the low fuel consumption and its environmental impact. The four internal channels and external escape routes provide optimal performance on dry as well as wet surfaces.
